

NEBOSH National General Certificate in OHS

Course Introduction

NEBOSH is the awarding organisation of choice for Health & Safety Professionals. The training is academically demanding which has led the NEBOSH National General Certificate to be the most recognised and popular qualification in the UK and abroad. The 'General Certificate' is divided into 3 units, NGC1, which is a common module for almost all NEBOSH Qualifications, covering Health and Safety Foundations, Law and Management Systems, GC2 covering the control of workplace hazards and GC3, a work-based practical assessment consisting of an inspection and report.
